

RADIA®

CONSISTENT CLOSE.

REDUCED NOISE.

NO SPLATTER.

FAST.

A1005 AUTO LID PRESS

MINIMIZE NOISE, HUMAN ERROR, AND PAINT SPLILLS WITH ONE TOOL

Whether it's going in the mixer or the hands of your customer, the lid of the can must be on tight. Avoid messy splatters with a mallet while assuring yourself and your customers that you can trust the seal of your lid every time. Using a mallet can be loud, potentially dangerous, and unreliable. The Auto Lid Press evenly applies pressure to the top of your can for an all over seal in a single motion so it's fast, safe, and consistent.

CAN SIZES:

One gallon and quart with adapter.

CONTAINERS:

ALL-PLASTIC, Hybrid, and Metal containers

INSTALLATION:

Designed with a counter mount or mobile base plate to accommodate numerous environments.
